Enhanced Access Screenings

Throughout the programme, our **Enhanced Access Screenings** can be identified by the following tags next to screening and event times.

Relaxed Screenings RS

Relaxed screenings are in relaxed conditions for neurodivergent audiences. These include dimmed lights and lower volume levels.

Audio Description AD

AD cinema provides a live commentary of the film's visuals. For audience members who are blind or partially sighted, AD is delivered through personal headsets or headphones which can be collected from venue staff.

Subtitles for the Deaf and Hard of Hearing SDH

Descriptive subtitles transcribe dialogue and relevant aspects of the soundtrack, including music and sound effects, attempting to give Deaf and hard-of-hearing viewers an equal experience to those who are able to watch films without descriptive subtitles.

British Sign Language BSL

Interpreted BSL includes the presence of a trained professional who translates spoken English into BSL and BSL into spoken English in real time. When present, they will be visible to all audience members under appropriate lighting.
